IBM Cognos Workspace enables users to assemble and explore all types of data in any time horizon through a dynamic, highly personalized interface.

It also enables users to assemble and explore data in depth and in detail, then collaborate with others easily—all in a highly personalized business intelligence workspace.

IBM Cognos Workspace helps organizations drive alignment and build consensus for more agile and responsive decision-making: delivering smarter decisions for better business results.

With Cognos Workspace, we can now:

- Arm users with powerful analytic capabilities that everyone can use to answer key questions, make better decisions and drive better business outcomes
- Provide collaborative business intelligence that employs easy-to-use social networking tools to share insights and gain alignment
- Enable actionable analytics that put insight into action everywhere, enabling users to respond rapidly to changing business conditions
